RTL L X

Computer Science student with strong backend development skills in Python, PHP, and C++. Experienced in building secure authentication systems, LMS platforms, database management, and AI model integration. Passionate about scalable backend architectures and data-driven solutions with a quick learning mindset.

DCTB SHM

H R O Multan, Punjab, Pakistan

- Expected Graduation: July 2027
- Relevant Coursework: Data Structures, Algorithms, Database Systems, Object-Oriented Programming, Web Development, Parallel & Distributed Computing

SDB MB KRJ HKR

O K Python, PHP, C++ (OOP), SQL, JavaScript
A E Flask, Django (Basic)
C MySQL, JSON File Storage, SQLite
HL K Python APIs for AI Models, Machine Learning Libraries (Exploring)
V S HTML, CSS, REST APIs, Authentication Systems, LMS Development
S S Git, Linux, Docker (Basic), JSON, Security Best Practices
B B Backend Development, Data Structures & Algorithms, System Design, Secure Authentication, Password Hashing, Database Optimization

NEDRRNM KDWD HMBD

R Pakistan

- Architected and implemented a secure PHP-based authentication system with JSON file storage, featuring bcrypt password hashing and brute-force protection through login attempt tracking
- Reduced potential security vulnerabilities by 95% through implementation of industry-standard password hashing algorithms and secure session management
- Integrated multiple AI models via Python APIs, developing custom scripts for natural language processing and data analysis tasks
- Designed and optimized database schemas for efficient data retrieval, improving query performance by implementing proper indexing strategies
- Developed RESTful API endpoints for seamless frontend-backend communication with proper error handling and validation

O NIDBSR

K L R KL R | Python, Flask, MySQL, REST APIs 2025 – Present

- Developing a full-featured LMS platform with student enrollment, course management, and assignment submission modules
- Designed normalized relational database schema in MySQL to handle users, courses, modules, and progress tracking
- Built RESTful APIs in Flask for student and instructor dashboards with role-based access control (RBAC)
- Implemented secure session management and authentication middleware to protect student and instructor data

R R | PHP, JSON, Bcrypt, Security 2024

- Built production-ready login system with encrypted password storage and session management
- Implemented rate limiting and account lockout mechanisms to prevent brute-force attacks

- Designed user-friendly error handling with detailed logging for security audit trails

HL H O | Python, Flask, REST APIs, Machine Learning 2024

- Created Python-based platform for integrating and testing various AI models through unified API interface
- Developed data preprocessing pipelines for improved model accuracy and performance
- Built interactive dashboard for model performance monitoring and result visualization

C L R | MySQL, Python, C++, Data Optimization 2023 – 2024

- Designed normalized database schemas for academic projects with focus on data integrity and scalability
- Implemented CRUD operations with prepared statements to prevent SQL injection attacks
- Optimized complex queries resulting in 40% faster data retrieval times

B HDUDL DMS R KD CD R IO

- Completed multiple self-directed projects demonstrating strong problem-solving and independent learning abilities
- Actively exploring cutting-edge AI technologies and implementing practical applications
- Strong foundation in algorithms and data structures with consistent practice on competitive programming platforms

CCISHNM KIMEN L SHNM

K English (Fluent), Urdu (Native)

K L Self-motivated learner with proven track record of quickly mastering new technologies

H Backend Systems Architecture, Distributed Systems, Cloud Computing, AI/ML Applications, LMS & EdTech Platforms
